

MAXELERATE™

**Faster Boot Drive for your Mac mini:
Store more stuff! Connect more stuff!**

**It's nothing short of revolutionary in design and function,
but many users need more from their Mac mini.**

Enter WiebeTech's Maxelerate!

FEATURES

Three USB 2.0 ports and three FireWire 400 ports;
daisy chainable

Supports Hi-Speed USB data transfer speed of up to
480Mbps, and IEEE 1394a data transfer speed of up
to 400Mbps

Supports 3.5" IDE drives

Delivers bus power (passed through from Mac mini
host) for downstream USB 1.1 and 2.0 devices

Delivers bus power (also passed through from
Mac mini host) for downstream FireWire devices

Allows daisy-chaining of FireWire 400 devices

Aluminum case with fan provides maximum cooling

Built-in power switch

Faster Boot Drive

Maxelerate boasts a disk read and write performance that is 30 percent faster than the drive that comes inside of the Mac mini. And because it's bootable, use it as a startup disk, taking full advantage of FireWire technology.

Thermally Engineered

Continuing WiebeTech's tradition of using intelligent metal design, Maxelerate is thermally engineered with heat issues in mind. Its aluminum design with integral internal die cast heat sink and fan allows for excellent cooling.

Store more stuff

Maxelerate holds drives up to 500GB. That's up to 12 times the 40GB or 6 times the 80GB internal storage that comes in a Mac mini. It gives you perfect growing room to edit more home movies, take more pictures, and listen to more music.

Connect more stuff

Maxelerate sports daisy-chainable ports: three USB2 ports and three FireWire ports, making it an ideal central station for more hard drives, digital cameras or many other computer peripherals.

Free more space

Best of all, you can achieve this speed, storage and all of the new ports in a space no bigger than the Mac mini itself. Beautifully designed out of aluminum to complement Apple's design, Maxelerate fits perfectly underneath any Mac mini.

TECHNICAL SPECIFICATIONS

Bridge Chipset: Initio1530, Cypress CY7C65640A

Bus Interface: USB 2.0 and IEEE 1394a (FireWire 400)

Data Speeds: USB 2.0 port maximum: 480Mbps
IEEE 1394a port maximum: 400 Mbps

Connector: Two USB type-A receptacles
One USB type-B receptacle
Three 6-Pin 1394a connectors
One DC-Jack input (+12V / 3A)

HDD Support: 3.5" IDE HDD, IDE ATA-6 standard

Power Supply: 12V / 3A AC/DC Adapter
Power Supply to HDD 12V / 2A, 5V / 1A

Dimension: 6.5"x6.5"x1.5" (165 x 165 x 38 mm)

Weight: (without HDD) 1.2 pounds (551 g)

Certification: CE, FCC

Compatibility: Mac OS X
Windows XP
Linux Distributions which support FireWire
